About

In 2001 I did a course in HTML and CSS, this was the beginning of my interest for, what later on, would became my carrer. In 2004, as the coordinator of the computer room of the school my first institucional website was on. In 2006 I continued to develop websites, one institutional and other for the radioweb of the company I was working as infrastructure support. In 2008 my carrer as Front-end began and I work specifically with Javascript since 2009. In all those years I worked with the main technologies of the market. I have experience with web development and team coordination. I keep studing, searching and updating myself with all new technologies. I develop using Angular since 2014.
